-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For example, claim 16, lines 5-12 is unclear because the Applicant's representative is claiming a plurality of times the phrases "a first circumferential band" and "a second circumferential band". The Examiner is not clear if the Applicant's representative is trying to claim more than one first band or second band or is referring to the same bands. If the Applicant's representative is trying to claim more than one first or second band, then the Applicant's representative has to name those bands differently in order to differentiate each different band.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Allen et al US Patent Pub. 2001/0016770.

Allen et al discloses a stent having serpentine circumferential bands connected one to the other, the bands include first serpentine circumferential bands (58) and second serpentine circumferential bands (3). The first and second bands are connected by a plurality of longitudinal connectors (50).

Every first serpentine circumferential band being adjacent to a second serpentine circumferential band and every second serpentine circumferential band being adjacent to a first serpentine circumferential band,

Additionally, the distal most openings of the stent being at least partially, bounded by a first serpentine circumferential band and at least partially bounded by a second serpentine circumferential band.

Finally, at least one opening being bound by the serpentine circumferential bands other than a second serpentine circumferential band (see Figure below).

Regarding claim 34, the Examiner interpreted the claim as follow:

Wherein the first bend and the second bend are oriented to the same direction and pointing away from the cell.
